## Education

|                                                  |                   |
|--------------------------------------------------|-------------------|
| K S Rangasamy College of Technology              | 2023 – 2027       |
| Bachelor of Technology in Information Technology | CGPA: 8.63 / 10.0 |
| Shri Janani Matric Higher Secondary School       | 2022 – 2023       |
| Higher Secondary Education                       | Percentage: 89%   |

## Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| ABB Global Industries and Services Private Limited                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | August 2025 – May 2026 |
| Software Engineering Intern                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Bangalore, India       |
| <ul style="list-style-type: none"><li>Increased automated test coverage by 80% by authoring 300+ unit and integration tests and building Playwright UI automation using Python, Codegen, Chromium, PyTest, Angular, TypeScript, JavaScript, Jasmine, Karma, and C#.</li><li>Cut release validation time by 45% by redesigning testing workflows around Docker containers and Azure DevOps CI/CD pipelines.</li><li>Reduced critical code issues by 70% by triaging and resolving 50+ SonarQube vulnerabilities across UI and API codebases written in JavaScript, TypeScript, and C#.</li><li>Partnered with an 8-person cross-functional team of developers and QA engineers to align testing standards and streamline deployment workflows, reducing review cycle friction.</li></ul> |                        |

## Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CodeCompass   Python, FastAPI, JavaScript, React, Groq LLaMA 3.3                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <ul style="list-style-type: none"><li>Built a Python backend with FastAPI that fetches repository files via the GitHub API and uses Groq LLaMA 3.3 to auto-generate structured onboarding docs.</li><li>Implemented stateful multi-turn chat with Pydantic-validated routes and 24-hour caching, turning any public GitHub repo into a queryable knowledge base.</li><li>Developed a React 19 + Vite 8 JavaScript frontend with a phase-based state machine, a custom drag-to-resize panel built with native DOM events, and a theming hook supporting localStorage persistence and OS-level preference detection.</li></ul> |
| EventSphere   Java, Spring Boot, JavaScript, React, MySQL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <ul style="list-style-type: none"><li>Built a full-stack event management platform with a Java/Spring Boot REST API and a JavaScript-based React SPA, supporting three role-based dashboards (Admin, Organizer, Attendee).</li><li>Implemented stateless JWT authentication with Spring Security in Java, enforcing role-based access control across 10+ REST endpoints for events, tickets, and user management.</li><li>Engineered a QR-code ticketing system using ZXing for event check-in, backed by Spring Data JPA/Hibernate and MySQL for persistent data storage.</li></ul>                                         |

## Technical Skills

Programming Languages: Java, Python  
Frameworks & Libraries: FastAPI, Spring Boot, Angular, Jasmine, Karma  
DevOps & Cloud: Azure DevOps, GitHub Actions, CI/CD Pipelines  
Tools & Platforms: Git, VS Code, Visual Studio, SonarQube  
Databases: MySQL

## Certifications

Oracle Certified Foundations Associate – Oracle University  
Design & Implementation of Human-Computer Interfaces – NPTEL Online

## Achievements

- Participated in the ABB Hackathon 2025, collaborating in a cross-functional team to design and prototype an innovative software solution.
- Solved 300+ LeetCode problems, strengthening problem-solving skills in Data Structures and Algorithms using Java.
